

CONTENTS

PREFACE	10
----------------------	----

Part 1 GENERAL PATHOPHYSIOLOGY

Chapter 1. Subject, Method and Aim of Pathophysiology. Concept of Disease. Etiology and Pathogenesis	11
Experiment as the Basic Method of Pathophysiology	12
Concept of Disease	12
Concept of Etiology	15
Concept of Pathogenesis	16
Principles of Treatment	18
<i>Tests and Tasks</i>	19
Chapter 2. Pathogenic Effect of Environmental Factors	21
Pathogenic Effect of Low Temperature (Hypothermia)	21
Pathogenic Effect of High Temperature (Hyperthermia. Burn)	22
Pathogenic Effect of Ionizing Radiation. Radiation Disease	24
Pathogenic Effect of Barometric (Atmospheric) Pressure Changes (Barotrauma)	34
Electrotrauma	37
Pathogenic Effect of Space Flight Factors	39
<i>Tests and Tasks</i>	40
Chapter 3. Role of Heredity and Constitution in Pathology	44
Molecular Genetic Hereditary Diseases	47
Hereditary Predisposition	51
Chromosomal Diseases	51
Congenital Diseases	54
Genetic Examination	54
Principles of Hereditary Disease Prevention and Treatment	57
Role of Constitution in Pathology	57
Diathesis	60
<i>Tests and Task</i>	61
Chapter 4. Organism Reactivity and Resistance	65
Concept of Reactivity	65
Concept of Resistance	66
Mechanisms of Reactivity	66
Role of Connective Tissue in Reactivity	67
Biological Barriers	67
Phagocytosis	68
Role of BAS in Reactivity	70
BAS Effect Control	73
<i>Tests and Tasks</i>	74
Chapter 5. Immunological Reactivity and Its Pathology	76
Mechanisms of Immune Response	77
Immunological Tolerance	80
Immunodepression	81
Immunodeficiency	82
Disorders of Systems Functionally Connected with Immune System	83
<i>Tests and Tasks</i>	84

Chapter 6. Allergy	87
Allergy in Initially Healthy Organism.....	87
Allergy in Organism with Immune System Pathology.....	88
Etiology	89
Immediate Allergy.....	92
Delayed Allergy	95
Autoallergy.....	96
Principles of Prevention and Treatment of Allergy. Desensitization	99
<i>Tests and Tasks</i>	100

TYPICAL PATHOLOGICAL PROCESSES

Chapter 7. Pathophysiology of Peripheral Blood Circulation	105
Arterial Hyperemia.....	105
Venous Hyperemia.....	107
Ischemia	108
Stasis.....	110
Thrombosis.....	111
Embolism	112
<i>Tests and Tasks</i>	113
Chapter 8. Inflammation	120
Cardinal Signs of Inflammation	120
Etiology	121
Pathogenesis	121
Alteration.....	121
Inflammatory Cells.....	121
BAS Role in Inflammation. Inflammation Mediators.....	123
Microcirculation Disorder	123
Exudation, Emigration, and Phagocytosis.....	125
Proliferation and Regeneration.....	126
Disorder of Metabolism	127
Inflammation and Organism Reactivity	127
Systemic Changes in Inflammation.....	128
Significance of Inflammation	128
<i>Tests and Tasks</i>	128
Chapter 9. Fever	131
Etiology	131
Pathogenesis	132
Mechanisms of Endogenous (Secondary) Pyrogens Formation.....	132
Protective Value of Fever.....	134
Metabolic Changes.....	135
Organ Changes	135
Types of Fever.....	136
Fever Treatment	138
Other Forms of Hyperthermia	139
<i>Tests and Tasks</i>	140
Chapter 10. Neoplasia	142
Cardinal Sings of Neoplasia.....	142
Etiology	143
Chemical Cancerogens.....	144
Biological Cancerogens.....	144
Pathogenesis (Cancerogenesis)	145
Neoplastic Transfomation	146
Peculiarities of Tumor Growth.....	149
Neoplasia Manifestations	150

Anaplasia.....	150
Systemic Manifestations of Neoplasia	153
Malignant Tumor and Organism Reactivity.....	153
Mechanisms of Protection against Tumor.....	153
Tumor Influence on Organism Clinical Manifestations of Neoplasia.....	155
<i>Tests and Tasks</i>	155
Chapter 11. Hypoxia	160
Etiology	160
Pathogenesis	162
Immediate Compensatory Reactions.....	162
Pathological Changes	166
Resistance and Sensitivity to Hypoxia	168
Principles of Hypoxic State Treatment.....	169
<i>Tests and Tasks</i>	169
Chapter 12. Starvation	174
Complete Starvation without Water Deprivation.....	175
Medical Starvation (Fasting).....	181
Complete Starvation and Water Deprivation (Absolute)	182
Incomplete Starvation.....	182
<i>Tests and Tasks</i>	185

TYPICAL DISORDERS OF METABOLISM

Chapter 13. Pathology of Energy Balance and Basal Metabolism	187
Disorders of Metabolism Regulation	188
Energy Production Increase.....	191
Energy Production Decrease	193
Pathology of Basal Metabolism	195
<i>Tests and Tasks</i>	197
Chapter 14. Pathology of Carbohydrate Metabolism	200
Disorders of Carbohydrate Metabolism Regulation.....	202
Insulin Insufficiency.....	207
Causes and Pathogenesis Absolute (Pancreatic) Insulin Insufficiency	207
Causes and Pathogenesis Relative (Extrapancreatic) Insulin Insufficiency.....	208
Insulin Insufficiency Manifestations	208
Metabolic Disorders	208
Pathophysiological Disorders.....	211
Diabetes Mellitus.....	212
Etiology	212
Pathogenesis	213
Diabetic Coma.....	216
DM Classification	216
<i>Tests and Tasks</i>	219
Chapter 15. Pathology of Lipid Metabolism	223
Disorders of Lipid Digestion and Absorption	223
Disorders of Lipid Transport in Blood	223
Disorders of Lipid Synthesis	224
Disorders of Intermediate Lipid Metabolism	225
Disorders of Lipid Accumulation and Deposition.....	225
Obesity	226
Lipoid Degeneration.....	231
<i>Tests and Tasks</i>	231
Chapter 16. Pathology of Protein Metabolism	234

Nitrogen Balance Disorders	235
Blood Protein Content Disorder	236
Disorders of Protein Entry, Digestion and Absorption	236
Protein Anabolism (Synthesis) Disorder	237
Acquired Disorders of Protein Synthesis	237
Hereditary Disorder of Protein Synthesis.....	237
Protein Catabolism Disorder	238
Proteolysis Disorders	238
Intermediate Amino Acid Metabolism Disorders	239
Hereditary Amino Acid Metabolism Disorders	240
Disorders of the Formation and Elimination of Final Protein Metabolism Products	241
<i>Tests and Tasks</i>	243
Chapter 17. Pathology of Acid-Base Balance	244
Forms of Acid-Base Imbalance	247
<i>Tests and Tasks</i>	250
Chapter 18. Pathology of Water and Electrolyte Balance	252
Water Balance Regulation Mechanisms.....	252
Hyperhydration.....	255
Local Edema.....	256
Systemic Edema	257
Hypohydration (Dehydration)	259
Electrolyte Imbalance.....	261
<i>Tests and Tasks</i>	263

Part 2
SPECIAL (SYSTEMIC) PATHOPHYSIOLOGY

Pathophysiology of Blood System	266
Chapter 19. Blood Volume Disorders. Hemorrhage	266
Total blood volume disorders	267
Hemorrhage	268
<i>Tests and Tasks</i>	274
Chapter 20. Pathology of Erythrocytes. Anemia	276
Quantitative Changes of Erythrocytes.....	276
Qualitative (Morphological) Changes of Erythrocytes	277
Anemia	278
Posthemorrhagic Anemia	278
Hemolytic Anemia	280
Diserythropoietic Anemia	286
Erythrocytosis	291
<i>Tests and Tasks</i>	293
Chapter 21. Pathology of Leukocytes. Leukocytosis and Leukopenia	297
Leukopoiesis Disorders	298
Quantitative Disorders of Leukocytes	299
Qualitative Changes of Leukocytes.....	302
Leukocytosis.....	302
Leukopenia	305
<i>Tests and Tasks</i>	308
Chapter 22. Leukemia	311
<i>Tests and Tasks</i>	320

Chapter 23. Pathology of Hemostasis	322
Hypocoagulation	325
Hypercoagulation	330
Disseminated Intravascular Coagulation (DIC Syndrome).....	332
<i>Tests and Tasks</i>	334
Chapter 24. Pathophysiology of Heart	338
Compensatory Mechanisms of the Heart	338
Cardiac Insufficiency Caused by Heart Overload	339
Myocardial Insufficiency	344
Coronarogenic Myocardium Damage (Ischemic Heart Disease).....	345
Non-Coronarogenic Myocardium Damage	347
Cardiac Rhythm Disorders (Arrhythmia).....	348
Cardiac Insufficiency Manifestations.....	351
<i>Tests and Tasks</i>	354
Chapter 25. Pathophysiology of Vessels	364
Elastic-Type Vessel Pathology.....	365
Atherosclerosis	365
Etiology	365
Pathogenesis	366
Morphological and Functional of Vascular Wall Disorders.....	371
Systemic Atherosclerosis Manifestations.....	371
Muscle-Type (Resistance) Vessel Pathology	372
Arterial Hypertension.....	377
Etiology	378
Neurogenic Hypertension.....	379
Salt(Na ⁺ , K ⁺ , Ca ²⁺)-Dependent Hypertension	380
Renal Hypertension.....	382
Secondary (Symptomatic) Hypertension	382
Manifestations	384
Pulmonary Hypertension.....	385
Arterial Hypotension	385
Capacitance Vessel Pathology. Venous Insufficiency	386
<i>Tests and Tasks</i>	387
Chapter 26. Pathophysiology of Respiratory System	391
Etiology	392
Pathogenesis	392
Ventilative Respiratory Insufficiency	392
Disregulative Ventilative Insufficiency	393
Obstructive Ventilative Insufficiency.....	394
Restrictive Ventilative Insufficiency	395
Diffusive Respiratory Insufficiency	398
Perfusive Respiratory Insufficiency	399
Disorders of Ventilation-Perfusion Ratio in Lung Diseases	400
Respiratory Pathology Manifestations	401
Asphyxia.....	405
Impairment of Non-Respiratory Functions of Lungs	406
<i>Tests and Tasks</i>	407
Chapter 27. Pathophysiology of Digestive System	411
Digestive Disorders in Oral Cavity	411
Caries and Parodontitis	412
Stomach Pathology.....	413
Gastritis	417
Ulcer Disease of Stomach and Duodenum.....	419
Pancreas Pathology	422

Digestive Disorders Connected with Impairment of Bile and Pancreatic Juice Secretion	425
Intestinal Digestion Disorders	425
Large Intestine Disorders	428
Intestinal Impassability.....	428
Impairment of Incretory (Hormonal) Function of Digestive System	430
<i>Tests and Tasks</i>	430
Chapter 28. Pathophysiology of Liver	434
Etiology	436
Pathogenesis	437
Cholestatic Hepatic Insufficiency	438
Acholich (Hypochoolic) Syndrome	439
Cholemic Syndrome (Cholemia).....	440
Mechanical (Posthepatic) Jaundice	441
Hepatocellular (Parenchymatous) Hepatic Insufficiency.....	442
Metabolic Syndrome.....	443
Syndrome of Antitoxic Function Impairment.....	446
Hepatic Coma.....	447
Parenchymatous Hepatic Jaundice.....	449
Hepatovascular Insufficiency.....	450
Syndrome of Portal Hypertension.....	451
Jaundice.....	452
Hemolytic Jaundice.....	453
<i>Tests and Tasks</i>	454
Chapter 29. Pathophysiology of Kidneys.....	459
Etiology	461
Pathogenesis	462
Role of Allergy.....	462
Role of Genetic Factors.....	462
Role of Medicines	463
Glomerular Insufficiency	463
Tubular Insufficiency	466
Disorders of Incretory (Non-Diuretic) Renal Functions	468
Manifestations of Renal Disorders	468
Urinary Syndrome.....	468
Systemic Clinical Syndromes.....	470
Glomerulonephritis.....	471
Nephrotic Syndrome.....	474
Pyelonephritis.....	476
Syndrome of Acute Renal Insufficiency	476
Syndrome of Chronic Renal Insufficiency.....	478
Uremia.....	479
<i>Tests and Tasks</i>	480
Chapter 30. Pathophysiology of Endocrine System	484
Preglandular Dysregulatory Endocrine Disorders.....	488
Glandular Endocrine Disorders	489
Postglandular Endocrine Disorders. Disorders of Peripheral Hormone Action.....	490
Compensatory-Adaptive Mechanisms in Endocrine System	490
Pathology of Pituitary Gland.....	491
Adenopituitary Gland Hyperfunction.....	491
Adenopituitary Gland Hypofunction.....	492
Neuropituitary Gland Pathology	493
Pathology of Thyroid Gland.....	493
Hyperfunction (Hyperthyroidism).....	494
Basedow's Disease.....	494
Hypofunction (Hypothyroidism).....	495
Myxedema.....	496
Goiter.....	496

Pathology of Parathyroid Gland	497
Pathology of Adrenal Gland.....	500
Adrenal Cortex Hyperfunction.....	500
Adrenal Cortex Hypofunction.....	503
Problems of Glucocorticoid Therapy Abuse.....	505
Adrenal Medulla Disorders	505
Concept of Stress.....	506
<i>Tests and Tasks</i>	509
Chapter 31. Pathophysiology of Nervous System	512
Etiology	512
Pathogenesis	514
Hypoxia	514
Cerebral Hemorrhage (Hemorrhagic Stroke).....	517
Typical Metabolic Disorders.....	517
Inflammation	518
Edema.....	518
Tumor.....	519
Genetic Disorders.....	519
Starvation and Electrolyte Disorders.....	520
Molecular, Subcellular, Cellular and Tissue Disorders.....	520
Sensitivity Disorders	522
Pain.....	523
Antinociceptive System	525
Disorders of Motor Function of Nervous System	527
Disorders of Autonomic (Vegetative) Function of Nervous System	527
Nervous Trophicity and Neurodystrophic Process.....	528
Higher Nervous Activity Pathology	531
Neurosis.....	532
<i>Tests and Tasks</i>	533
ANSWERS TO TESTS AND TASKS	536
INDEX.....	538
